DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statements filed January 21, 2005 and February 28, 2005 fail to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because U.S. Patent documents have not been properly cited. Each US patent, U.S. patent application publication, and unpublished U.S. patent application should be listed on Form PTO 1449 under the heading "U.S. Patent Documents". U.S. applications must be identified by the inventor, the eight-digit application number (the two digit series code and the six digit serial number), and the filing date. If a U.S. application being listed in an IDS has been issued as a patent, the applicant should list the patent in the IDS instead of the application. Individual documents contained in an U.S. application (i.e. declarations, restrictions, or other office actions) should not be listed on the IDS; however, if there are specific document(s) within the U.S. application that applicant wishes to bring to the examiner's attention, applicant is asked to specifically identify said document(s) and concisely explain their relevance to the patentability of the instantly claimed invention. When citing U.S. Patent Documents on Form PTO 1449, there should not be any cross-references to Foreign Patent Documents. Citations properly presented on said information disclosure statements have been considered and initialed. A line has been drawn through the improper citations, and said citations have not been considered. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission

Art Unit: 1623

of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609 ¶ C(1).

Although a concise explanation of the relevance of the information is not required for English language information, applicants are encouraged to provide a concise explanation of why the English-language information is being submitted and how it is understood to be relevant. Concise explanations (especially those which point out the relevant pages and lines) are helpful to the Office, particularly where documents are lengthy and complex and applicant is aware of a section that is highly relevant to patentability or where a large number of documents are submitted and applicant is aware that one or more are highly relevant to patentability.

Oath/Declaration

2. This application presents a claim for subject matter not originally claimed or embraced in the statement of the invention. Newly added claims 14-19 read upon limitations not presented in the original claims. A supplemental oath or declaration is required under 37 CFR 1.67. The new oath or declaration must properly identify the application of which it is to form a part, preferably by application number and filing date in the body of the oath or declaration. See MPEP §§ 602.01 and 602.02.

3. The reissue oath/declaration filed with this application is defective because it fails to identify at least one error which is relied upon to support the reissue application. See

37 CFR 1.175(a)(1) and MPEP § 1414. It is not sufficient for an oath/declaration to merely state "this application is being filed to correct errors in the patent which may be noted from the changes made in the disclosure." Rather, the oath/declaration must specifically identify an error. In addition, it is not sufficient to merely reproduce the claims with brackets and underlining and state that such will identify the error. Specifically, applicant doesn't state e.g., that the error was in claiming "consisting essentially of" which they now feel is too narrow, and they now want to correct this error by broadening the claim by changing it to --comprising--. Instead, applicant merely shows it. See *In re Constant*, 827 F.2d 728, 729, 3 USPQ2d 1479 (Fed. Cir.), cert. denied, 484 U.S. 894 (1987). Any error in the claims must be identified by reference to the specific claim(s) and the specific claim language wherein lies the error.

4. Claims 1-8 and 10-19 are rejected as being based upon a defective reissue under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the oath is set forth in the discussion above in this Office action.

Response to Amendment

5. The amendment filed September 19, 2003 proposes amendments to claims 14-19 that do not comply with 37 CFR 1.173(b) and (d), which sets forth the manner of making amendments in reissue applications. A supplemental paper correctly amending the reissue application is required.

Art Unit: 1623

Conclusion

6. Claims 1-8 and 10-19 are pending. Claims 1-8 and 10-19 are rejected. No claims are allowed.
